

## INTRODUCING THE NEW 1.1 PROTECTOR

The new NU0001 1100va Battery Back Up Device offers all the functionality of the older version but with some significant improvements.

The new 9AH Battery offers a 10% increase in output power, improving both life and cycle times.

The unique Sleep Function means this unit is fully compliant with BS 14637 : 2007.

The new Protector 1.1 comes with a Standard UK 3 Pin Plug , pre-wired and pre-fitted, saving time and costs when connecting directly into a 230v Power Socket.

In addition, the two new output sockets are also designed to suit a standard UK 3 Pin Plug, making this unit very easy to install when connecting to one of NVM's pre-wired Control Panels such as NT1006E, NT1004W or NT1103.

The new Protector 1.1 is now supplied with a factory fitted volt free alarm connection enabling the unit to automatically awake from sleep mode on receipt of the fire alarm signal.

The unit can also be connected to a manual switch or supplied with a Remote Control Receiver that can be paired with an NVM Key Fob or Wireless Switch such as NT1016, NT1017, NT1117
