

NVM Launch New Series 3 Door Range

After more than a year in development, North Valley Metal have released the new Series 3 door range. So what makes this door any different than the competition? The answer is simple, we didn't take a full year developing it for nothing.

We looked at the competition and incorporated all the best features and then added a few of our own, which makes the Series 3 range, probably the best door range on the market.

No detail has been overlooked, from the stainless steel D Handles, Hinges and Thresher, to the fire retardant Rockwool infill. Nothing has been left to chance in the development of the Series 3 range.

Why introduce another range of doors into a market that is already flooded with cheap Chinese doors? The answer is, precisely for that reason. NVM believe that the UK market is crying out for a quality door at a competitive price and the new Series 3 range fits that bill. "Customers want a quality door that won't fail. But they also want a door that isn't going to cost them the earth. They have become more savvy, particularly in these tough economic times" said Mick Walton, Development Manager at North Valley. "We have spent an awful lot of time developing this range and we are confident our customers will appreciate the price and quality".

Having been in the door market for more than 43 years, North Valley Metal has come to understand the needs of our customers, and just as importantly, NVM listens to those customers.

"Why should I buy and NVM Series 3 door and not a cheap Chinese door?" Good question. Because North Valley Metal's Series 3 steel doors offer superior quality and the chance is you will not pay any more than you are now. It's a win – win situation.

If you would like to know more about our new Series 3 range of Steel Doors, please contact NVM on 01282 615239 and ask for Michael or visit www.nvmgroup.co.uk
