

A Year in the life of..

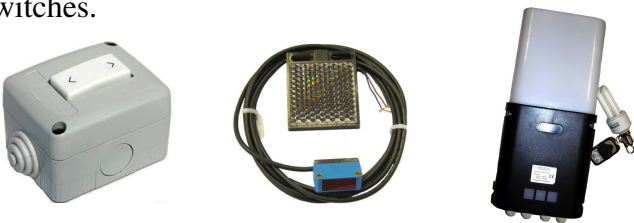

For many, it has been another tough year. The economy doesn't show signs of improving and the government continues with its austerity spending cuts.

Over the last twelve months there have been many changes at NVM too. Since the opening of our second warehouse two years ago we have expanded into a 3rd warehouse which was necessary to house our additional stock lines and we have invested in another new 7.5tonne truck.

The biggest change for NVM is the range of products we now offer and we think it's about time we told you all of the new ranges we have introduced.

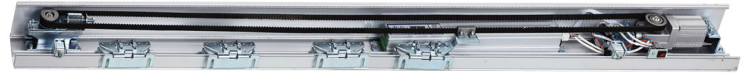

Our range of Receivers / Transmitters / Controllers now include garage door controllers, waterproof controllers, group controllers, LED switches, fire shutter controllers and radio controllers.

To compliment our controllers we offer Photocells with detection ranges from 4.7 metres up to 15 metres in both reflector and thru beam options, Light Grids, Safety Edges, Single and Multi-channel Fob Handsets, Key-switches from 16amp to 32amp that are available in keyed alike or random and Rocker-switches.

We have also extended our Tube Motor range which is now available from 50nm up to 330nm in either Manual or Non Manual over ride options and are supported by a full range of drive wheels and limit collars including 5"10swg, 4"9swg, 4"16swg, Octagonal in 60mm or 70mm and Du-Prat in 65mm or 89mm.

Again, to compliment the Tube Motors we have extended the range of Crank Handles we offer, available from 1.2metres up to 2metres, Hexagonal Crank Handles, Extended Rigid Eyes and Universal Joints.

NVM now offer a range of Automatic Sliding Door Kits that are supplied complete with Remote Control, Battery Backup, Sensors, Photocells, Track Hood and Key-switch.

Also available is a full range of access devices including Push Pads, Keypads, Fingerprint readers and Foot Pads.

To comply with Health & Safety Regulations, NVM also offer the "OPTEX" range of Dual Motion / Presence Sensors and Side Panel Presence Sensors which are fully compatible with our Automatic Sliding Door Kits.

We have added to our range of Flange Mounted / Fire Shutter Motors and can now offer from 200kg lift to 1,500kg lift. Available in Single & 3Phase versions with discs to suit barrels from 4" to 6" and are supplied complete with pre-assembled endplates. Also available are Fire Control Panels, Fusible Links and Remote Controls, and an extensive range of UPS's

THE NVM CHARTER

We are very proud of our history and have been serving the Door & Shutter market since 1966.

- ✓ Our aim is to constantly strive to improve our service, quality and product offer.
- ✓ 88% of all orders are despatched on the day of receipt. Our goal is to improve this statistic.
- ✓ 98.6% of all orders are despatched complete. Our aim is to achieve 100%.
- ✓ We have spent the last year introducing new products to our range. Our aim is to continue to introduce new innovations and develop further product lines.
- ✓ We have many long-standing and newer customers. Our aim is to improve the information flow to all our customers with regular news updates, flyers and special offers.
- ✓ Finally, it is important to us to know and understand what our customers want. Our aim is to gather more feedback, and wherever possible act on that feedback to give our customers the best solutions.

Series 3 Steel Doors

Our Series 3 Single Door Range was launched 2 years ago, and during this time we have changed the colour to a standard RAL7037 grey finish. Still offered are Fire Exit Doors pre-drilled to accept Briton Panic Furniture (which is supplied in the price) and 12 Point Locking Personnel Doors.

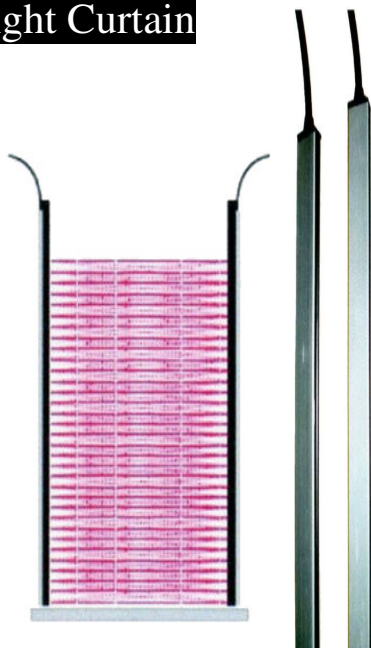

We extended our range of stocked Double Door-sets and now offer door sizes from 1600, 1700, 1800 & 1900 widths and 2030 & 2090 high. Again all supplied pre-drilled and complete with Briton Panic Furniture and Flush Bolts as standard.

All of our stocked doorsets are also available pre-fitted with Vision Panels, Louvre' Panels, Spy-holes and Letterboxes to compliment our hardware fitting service for Closers, Stays, Outside Access Devices and Double or 3 Point Panic Bolts.

Infrared Light Curtain

NVM introduced the new 1820mm Light curtain. Supplied complete the new Light Curtain offers a safety grid of up to 5 metres wide using 94 embedded infrared scanning beams. Compatible with our NT1103, NT1006 and NT1107 Controllers, the Light Curtain has a self-monitor function and is IP 65 rated and is supplied in a brushed aluminium finish.

Swing Door Operators

We launched our Automatic Swing Door Operator, which is supplied complete with remote control setting functions and two standard sensors. The operator is compatible with the "TOPSCAN" sensor, and will accept an array of function accessories including push-button, keypad, fingerprint access and Battery Back Up.

The Swing Door Operator can be synchronised to act as a pair on double doors and has push-to-open and settable pressure functions for added safety.
