

## New Extended Range of Flange / Fire Shutter Motors

NVM now offer an extensive range of Flange / Fire Shutter Motor kits. From 300kg to 800kg in single phase and from 300kg through to 1,500kg lift in 3 phase.

We can also offer 600kg lift Fire Shutter motors in 3 phase complete with Fusible Links.

Also included in the range are Volt Free Controllers and pre-wired Remote Controllers.

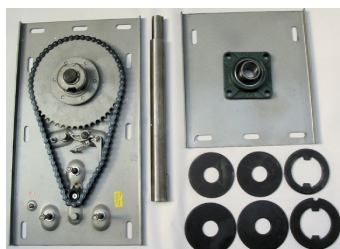

Our flange motor kits are supplied with Impulse Up / Deadman Down option and pre wired to a quality low voltage 3 button station.

We carry spare Haul chain in stock and offer the kits with a range of disc sizes from 94mm up to 202mm.

Each kit contains Dummy Endplate, pre-drilled to accept the quality 4 hole Flange Bearing, a drive end plate pre-drilled for fixing, complete with pre-mounted plate-wheel, sprocket, drive chain and chain brake. The quality shaft (400mm long) supplied is complete with Keyway and key and comes with 2no 5mm thick discs.

- ✓ Light grid / Photocell
- ✓ Integral Alarm Sounder
- ✓ Integral Battery Back Up
- ✓ 6 Limit settings
- ✓ Pause Function

## AUTOMATIC SLIDING DOOR KITS

NVM continues to develop the Sliding Door range and we are pleased to announce the launch of our new Track and Hood system.

Designed to minimise labour time the new hood cover does not require and fixings, hinges or drilling. It simply clips into place and can be lowered and raised on the integral hinge for servicing, maintenance, etc.

Development didn't rest with the track and hood. We have upgraded our main-board controller and remote control functions. Our fob handsets now function using rolling code technology and the control unit will accept up to 200 fobs.

Our continued development of the Sliding Door range includes extending the range of accessories, and we can now offer a new range of locks including manual and electronic, an extended range of push button and access controls and function keypads.

To comply with Health & Safety Regulations, NVM also offer the "OPTEx" range of Dual Motion / Presence Sensors and Side Panel Presence Sensors which are fully compatible with our Automatic Sliding Door Kits.

## CONTROL SYSTEMS

Over the last year NVM has added to its already extensive range of Receiver / Controllers, Switches and Remotes.

Accompanying this newsletter is our new comprehensive Control Systems catalogue detailing not only the controllers you might be used to seeing, but a range of new controllers, switches and wireless transmitters. We now offer from stock, LED switches, wall mounted switches in either wired or wireless options, group controllers and commands, computer controlled transmitters, intelligent garage door controllers with external light, or integral light options and an array of handsets, from single channel to 16 channel and LED display to multiple timer functions.

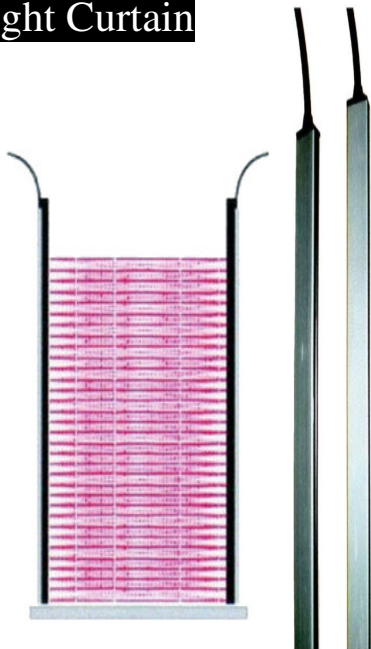

Our fob range includes single channel handsets to multi-channel handsets that will operate doors as individual or as a group.

## Infrared Light Curtain

NVM introduced the new 1820mm Light curtain. Supplied complete, the new Light Curtain offers a safety grid of up to 5 metres wide using 94 embedded infrared scanning beams. Compatible with our NT1103, and NT1107 Controllers, the Light Curtain has a self-monitor function and is IP 65 rated and is supplied in a brushed aluminium finish.

## NVM LAUNCH DIRECT DRIVES

NVM are proud to announce the launch of our Direct Drive range of NICE (M-Tec) Motors. Our range includes Mechanical or Digital Limit setting options, and supplied pre-wired including Control Panel, Plug and low level haul chain.

The motors will be available from stock and can be supplied either as a complete kit including shafts, discs and bracket packs, or as individual components.

Our aim is to offer the most competitive price we can for the highest quality product. The stock range will be from 140nm to 1400nm kits, in both Single and 3 phase.

In addition to the Direct Drive Motors we will offer a range of control panels and board variants to compliment the motors.

We fully appreciate that we are new to the direct drive market, which is why we have partnered one of the market leaders in direct drive technology and engineering. Many of you will have used this brand of motor and will be well aware of its performance record.

NVM has been in the industrial door business for more than 45 years, and we like to think our reputation for quality and service is second to none. Coupled with a product that has an established performance record from one of the leading manufacturers in direct drive motors, we believe we offer a formidable partnership.
