

## Topscan joins the NVM Family

NVM are pleased to announce the latest addition to our growing family. From immediate effect NVM are now official distributors of the Topscan range of Sensors.

We are very pleased to be associated with a supplier whose reputation in the Swing Door Sensor market is second to none.

Many manufacturers will recognise the brand name "Topscan" and will be aware of the quality and functionality of this market leading range.

This addition means NVM can now supply a full range of sensors for Automatic Sliding Doors and Swing Door Operators that fully comply with the latest changes in safety legislation, and the Topscan range will complement not only our product range, but our own Swing Door Operators.

Our intention is to offer the Topscan range at the most competitive price we can and we are grateful to the team at Topscan for the faith they have shown in NVM and our ability to enhance the Topscan brand in the UK.

The Topscan Range will include:

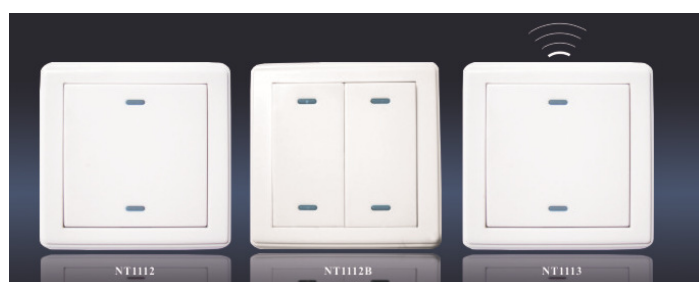

- SDS201: Topscan-S-M/L310
- SDS202: Topscan-S-M/L750
- SDS203: Topscan-S-MS/L750
- SDS204: Topscan-S-M/L900
- SDS211: Cable Loop

## Switches and L.E.D.'s

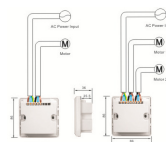

As detailed in our Control Systems Catalogue, NVM now offer a full range of Rocker and LED Touchscreen Switches designed to function with our existing range of Controller / Receivers.

Switches are available in either Single or Double options and either Wired or Wireless.

Multi-channel switches are also available to enable operation of up to 16 individual shutters, whilst Timer Switches and Touch-screen LED Switches complete the range.

All the range are programmed to allow Deadman On / Off function and wired versions are supplied complete with backing boxes for flush mounted installation. Timer and Multi-channel switches have an LCD display screen.

To comply with Health & Safety Regulations, NVM offer the "OPTEX" range of Dual Motion / Presence Sensors and Side Panel Presence Sensors which are fully compatible with our Automatic Sliding Door Kits.

## AUTOMATIC SLIDING DOORS

Over the last year NVM have added to our already extensive range of Automatic Sliding Doors, Swing Door Operators and Access Control Systems.

Accompanying this newsletter is our new comprehensive Automatic Sliding Door Systems brochure detailing not only the standard Single and Double Sliding Door range, but a range of new kits including Semi-Automatic Doors, Hermetic Doors, Rotating and Curved Doors, and Telescopic Doors. We now also offer from stock, a full range of Access Control systems including Fingerprint Readers, Keypad and Push-pad Control and Function Control

that includes Remote Access & Wireless Control. In addition to Access Control, we now stock an extensive range of sensors including Optex Safety Sensors, Topscan Sensors and a range of Microwave and Infrared Motion Detection Sensors. If you would like to know more call [01282 615239](tel:01282 615239).

## Technaware UPS Devices

**NVM join forces with Technaware.**

Technaware are one of Europe's leading suppliers of UPS devices with a strong company ethos in quality, reliability and competitiveness. NVM now have a full range of UPS Devices in stock from 850va to 2600va at competitive prices. Other sizes are also available.

NU005: 0.85kva  
NU001: 1.1kva  
NU002: 1.5kva  
NU003: 2.0kva  
NU004: 2.6kva  
NU006: 3.4kva

## DIRECT DRIVE UPDATE

**A big thank you to all our customers.**

We would like to offer our thanks to all our customers who have ordered their Direct Drive motors from NVM over the last two months.

Since its launch in February the range has been extremely well received, (we never expected anything else), as many of you remember the M-Tech range from before.

**In an effort to encourage more of you to give us a try and by way of thanks for those who have, we can now offer free delivery on all orders of £1,000 or over for a limited period.**

We are fully stocked, including Endplates, Foot-mounts, Shafts, Discs and Bearings, although Direct Drives are available as motor / controller only, or any other combination that suits you.

Whilst we carry all the "standard" disc sizes to suit 5", 5 1/2", 6" and 8" Barrels, we will gladly manufacture disc sizes to suit whatever tube you are using.

*Free delivery on all orders of £1,000 or more on Direct Drive Motors (Limited period only)*
