

## NVM Launch new 4 Way Group Controller / Receiver

NVM are pleased to announce the launch of our new 4 Way Group Controller / Receiver.

The NT1019 offers the flexibility of a Remote Control with the simplicity of a Group Command.

The unit has 4 Channel Remote Control allowing the wireless operation of up to 4 shutters, and is compatible with our NT1016 Shingle Channel fob, NT1017 Multi-Channel Fob, our NT1012 6 Channel Wall Mounted Handset, our NT1012B 16 Channel Wall Mounted Handset or our range of Wireless Switches, Rocker Switches, and Key Switches.

The 4 shutters can be operated individually or as a group.

Not only does the unit operate with Remote Control, each motor has its own Manual Switch Terminal allowing individual operation of up to 4 shutters in each unit. Alternatively the unit has a Local Manual Switch Terminal that allows all 4 shutters to be operated as a group by a single Key Switch or Rocker Switch.

But the *Pièce de résistance* is the Master Terminal, which allows the NT1019 Group Controller to be connected to other Units, making the number of shutters that can be operated with a single Key Switch or Rocker Switch almost limitless. This unit is ideal for commercial properties and offices where the operation of many windows and doors from a single switch is required.

## Safety Edge News

Safety Edges have become an integral part of the Door industry and in keeping with our desire to offer the widest product range possible, NVM has developed an extensive range of Safety Edges to suit every application, from large Industrial Roller Shutters to the smallest Window Shutter.

All our Safety Edges are offered in either Wired or Wireless options, are monitored and conform to the latest European Safety Regulations.

Included in the range is our popular Garage Door Resistive Safety Edge that is available in kit form, which is supplied complete with: Intelligent Control Panel, Wireless Transmitter, Contacts, Resistor and Copper Embedded Rubber Safety Edge to suit either 55mm & 77mm Lath.

In addition, we now offer a range of Safety Edges to suit Industrial Roller Shutters, with a range of track options including Aluminium and Steel

All our Safety Edges operate with our Multi-Function Wireless Transmitter and Intelligent Control Panel, that not only monitors the Resistive Safety Edge, but also monitors the strength of the Long Life Lithium Battery.

The unique Copper Embedded Crush Chamber allows any NVM Safety Edge Rubber to work with our Contacts, Plugs and Transmitters.

## DITEC RAPID DOOR SPARES FROM STOCK

As a further collaboration with Ditec, North Valley Metal will now carry Rapid Door Spare Parts in stock.

The stock will include a range of common replaceable components from the most popular High Speed Doors sold in the UK, including Sector Reset, Sector Plus and Traffic C doors.

In addition, NVM will carry stocks of Motors, Control Boards, Brake Discs & Guides, Safety Edge Shoes, Photocells etc.

All stocked components can be dispatched the same day on a next day, am or pre 10.00 service.

For further information contact 01282 615239 or email [sales@nvmgroup.co.uk](mailto:sales@nvmgroup.co.uk)

## Alimax From NVM

Alimax is the new Rapid Roll up Door specifically designed for the Food industry.

Manufactured from special composite material, the self-repairing curtain and the INVERTERmotion device guarantee optimum compliance and making the Alimax the most advanced Rapid Door on the market.
