

GATE OPERATORS COME TO NVM

NVM are pleased to announce the launch of our new range of Automatic Swing and Sliding Gate Operators and Accessories.

As you would expect from an Italian made product, the range is stylish, reliable and extensive.

Like everything we do we have been very careful to choose the right partner and the right product, and it was with these criteria in mind that we have put together a range of operators that are not only simple to install, but aesthetically pleasing to the end user.

The range offers Swing Operators in two designs, Sliding Gate Operators for gates from 200kgs to 4,000kgs, Underground and Overhead Sectional Door Operators and available in either 240Vac or 24Vdc options.

The advanced electronic technology means that programming is simplicity itself. The entire range can be programmed using a single, removable Digital

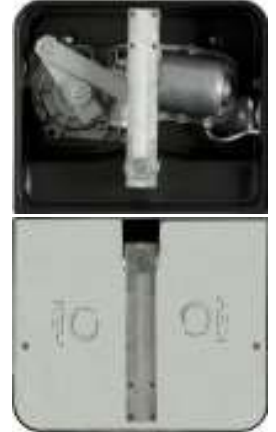

Programmer. The beauty of this is that not only does it prevent tampering with by inquisitive clients, but you only need 1 Digital Programmer.....ever!!

Not only that, the Mainboard is designed so all the extras such as Remote Control, Battery Back Up and Low Voltage Transformers are simple Plug In's

For further information contact NVM on 01282 615239 or email sales@nvmgroup.co.uk

The new underground Operator for Swing Doors for leaves up to 3m has Opening & Closing Mechanical Stops, adjustable speed and slowdown function, built-in encoder (24v version), water resistant remote control included, and Internal & External Unlock facility.

Our premium Swing Door Operator combines power, versatility and reliability with an Electromechanical Geared Motor for leaves up to 4 metres whilst our Articulated Arm / Swing Arm Operator for Pedestrian Gates is the perfect solution for lighter weight doors and where fixing space is limited.

Like everything in the range, our new Swing Gate Operators use the same Courtesy Light, the same Remote Control, the same Digital Programmer, have Screw-less Sight lines and are available in both 240Vac or 24Vdc options.

Our light-weight Operator with Articulated Arm is available with a standard Slide Arm or Pedestrian Gate Arm and Night Light system.

SEASONS GREETINGS FROM

❄️ 🎄 **ALL AT NVM** 🎄 ❄️

Well it's that time of year again when we like to spread Christmas Cheer and give gifts to the ones we love, and here at NVM we are no different.

That's why we would like to wish all of our customers a Merry Christmas and a very prosperous New Year. And to show our appreciation for all your support this year we would like to offer a

£100 VOUCHER

to spend at M&S, NEXT, B&Q or DEBENHAMS, when you order £1,000 or more on a single order between now and 31st January 2015. Just email, fax or post the voucher below with your order and we will do the rest.

DITEC SPARES NOW IN STOCK AT NVM

Don't forget, we now offer a Spares Service for all Ditec Rapid Doors, many available from stock including:

- ✓ Motors
- ✓ Control Panels
- ✓ Safety Edge Shoes
- ✓ Zipper Kits
- ✓ And much, much more.

If you need a new *Spares Catalogue* just contact the office on **01282 615239**

Sliding Gate Operators now available at NVM

Our Electromechanical Geared Sliding Gate Operators satisfy every demand from 200kg to 4000kgs.

With built in Night Light as standard, Slowdown function, and Easy Accessible Release System, they are the perfect solution.

Available in two ranges, and both with die-cast Aluminium Base and reversible Cover that ensures the light will always face toward the Gate opening side.

ACCESSORIES

To support our new Swing and Sliding Gate Operators we also offer an extensive range of accessories, from Photocells, Switches, Transmitters, Courtesy Lights to spare Panels and Digital Programmers.
