

AUTOMATIC SLIDING DOOR KITS FROM APRIMATIC

NVM are pleased to announce the arrival of our new Automatic Sliding Door Kits from Aprimatic.

Aprimatic, one of the leading names in Door Automation have partnered with NVM to offer a range of Automatic Sliding Door kits and Accessories.

The Door kits are supplied pre-assembled and pre-programmed so in most cases it is simply install and go.

Kits are available in Single Door versions from 3 metres and 4 metres, and Double Door versions from 3 metres to 6 metres.

Fully compatible with all Safety & Motion Detection Sensors, the Control Panel can be finely adjusted using either the wireless Keypad or via PC Software.

The kit comes complete with Hood and Built-In Battery Back-Up Device and Installer Friendly Main Control Panel.

The functionality of the kit is controlled by a 6 Function Key Pad in either wired or Wireless Options

KIBO PRO:

Select the Operation Logics of the door and resets the system.

Set many types of parameters.

Set a Password to protect the system.

Setup 4 Daily events.

Diagnostic & Service Functions.

Auto Swing Door Operator added to Range

NVM has extended our range of Aprimatic Operators with the introduction of our new SDK880 Heavy Duty Swing Door Operator.

Like it's lighter SDK800 cousin the SDK880 is of Italian manufacture, and offers the same functionality, reliability and style.

The SDK880 offers all the same functionality as the SDK800 but with accept door leaf weights of up to a massive 200kgs.

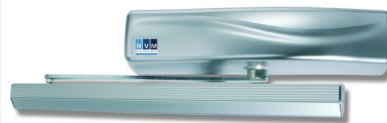

The **Push & Go** function enables the unit to recognise when the door is pushed by hand and allows opening.

The **Low Power** mode enables the unit to operate at lower speeds which is particularly useful for disabled uses.

The **Emergency Function** mode enables the unit to Open or Stop the door in accordance with the user setting.

The **Obstacle Detection** function, thanks to the built-in Encoder, stops the door and reverses the direction when an obstacle is detected.

The unit can also be set without the need of Selector, by using the Dip Switches.

For more information on our new range of Automatic Swing Door Operators: **Call 01282 615239 or email sales@nvmgroup.co.uk**

Optex OA-AXIS T

NVM would like to introduce the new OA- AXIS T, Dual Threshold & Motion Sensor.

The Axis T is tested and approved by the German test organisation TUV and complies with the German DIN 18650 and the European Standard EN 16005.

As a Motion Detector Sensor, the Axis T provides a large detection area and provides fast detection for any traffic including trollies approaching from any angle.

As a Safety Presence Sensor, the Axis T can be set very accurately and can be moved 6° towards or away from the door. The Sensor detects a person or object and holds the door open as long as they are in or near the Threshold area.

The Optex OA-AXIS T is available from Stock

Optex OA Presence T

Cut from the same cloth the OA-Presence T, Side Safety Presence Sensor is tested and approved by the German test organisation TUV and complies with the German DIN 18650 and the European Standard EN 16005.

As a Side Screen Safety Sensor, the Presence T can be installed at the rear end of the door to secure the side screen and prevent the door from hitting someone or something during the opening cycle.

As a Theshold Sensor, the OA-Presence T is ideal when used in conjunction with external activators such as push Buttons. The OA-Presence T will completely secure the threshold area and prevent the doors from closing when it is open or during its closing cycle.

The Optex OA-Presence T is available from Stock

CODY KEYPAD

The Cody Universal 2 Keypad allows connection to any Control Panel where a N/O Relay is present. Supplied with its own 240v Control Panel, the Keypad is available as Standard or Quadraline IP65 Rated for external installation.

The Cody 2 will accept up to 50 different passcodes and is ideal for Car Parks and Automatic Entrance Systems.

The 8 Digit Mastercode makes the Cody 2 one of the most secure Keypad systems on the market.

NVM has negotiated some special prices that we can pass on to our customers.

Also available in the Cody Universal Range is the Keyless Transponder Unit.

The advantages of a wireless system and as secure as the Cody Universal 2.
