

Bottom Rail Seals & Guide Brushes

Now available from NVM are a range of Guide Brushes and Bottom Rail Seals to suit Industrial Roller Shutters.

The Bottom Rubber Seal is made from quality EPDM and requires no mechanical fixing. The design of the seal fits perfectly over the T Rail whilst the Guide Brushes are designed to give maximum protection against draughts whilst

reducing shutter vibration and noise levels.

The Clip on PVCU Carrier enables easy installation without the need for mechanical fixings.

The Rubber Deals are available by the metre with a minimum order of 5 meters and the Guide Brush Strips are available in 5 metre lengths. Both are available from stock.

FIRE SHUTTER U.P.S DEVICES

North Valley Metal now offer a range of UPS Devices specifically designed for Fire Shutters. Each device has our trademark Sleep Mode, ensuring long function life.

The units are also supplied with a connection to the Fire Alarm System. On receipt of the fire alarm signal, the unit will automatically switch on and supply power to the fire Shutter Panel, even if the power has been off in the building for months.

No other UPS on the market can offer this.

All UPS's conform to BS 14637 : 2007
