

CELEBRATING 50 YEARS OF SERVING THE INDUSTRY

Just like you and me, when we reach that special age, we like to celebrate and here at NVM we are no different.

September is a very special month for us at North Valley Metal, as we celebrate our 50th Year in the Door Industry, a fact we are very proud of.

And we would like to celebrate this achievement with our customers, some of whom have been with NVM for a very long time.

We have seen many changes in the Industry over those 50 Years, with the introduction of Electric Shutters, Sectional Doors, High Speed Doors, Electric Gates to innovations like Remote Control and NVM has remained ever present.

During a year-long celebration we will be putting together some very special offers and promotions, as a thank you to all our customers and to celebrate our 50 Years in the industry.

BOLTON BRADY COMES HOME

After more than 50 Years, one of the country's leading Door Brands returns to NVM.

Back in the annals of time when Bolton Brady was part of Walton's foundry, North Valley Metal supplied them with Engineered Products and Castings.

NVM went on to become the largest supplier of Roller Shutter Components in the UK and as for Bolton Brady... well the rest is history!!

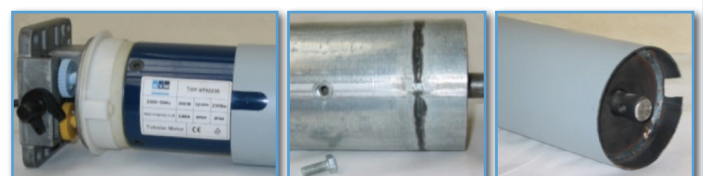

It is our pleasure to welcome Bolton Brady into the NVM Family and to celebrate the joining of these two founding companies of the Industrial Door Industry, NVM can now supply a full range of Barrel Assemblies at competitive prices.

The Bolton Brady range of Assemblies include Single and 3 Phase Drives, Spring Assisted, Push Up's and Hand Chain Operated Barrels.

Barrels are prepped at the Drive End, fitted with Dummy End and include Rivnuts.

AUTOMATIC ENTRANCE SYSTEMS NEWS

NVM are pleased to announce that from the 1st October we can now offer our popular SDK100 Series Auto Sliding Door Kits pre-assembled, pre-wired and pre-cut to length.

"We looked at the market and what caused the biggest problems to our customers who had won orders for Automated Doors", say Joe Slevin, Area Manager for Automated Entrance Systems. "It became quite clear that their biggest problem was not installing the Kit, but setting it up and getting the right parameters."

The decision to offer pre-assembled and pre-wired kits was simple. Our Aprimatic Kits are sold pre-assembled already so to replicate this for our SDK100 Kits made sense.

To order your Pre-wired, Pre-Assembled Kits, just complete the new Auto Door Order form and we will take care of the rest.

Every Kit will be supplied complete to your specification, including Sensors, Access control and Safety Control.

Key Pads and Morning Entry Switches will be Plug and Play, and with all the Parameters and Buffers pre-configured, nothing could be simpler.
